CAREER SUMMARY

Backend Developer with 4+ years of experience and 1+ year as a Data Engineer, building scalable backend systems, RESTful APIs, and high-volume data pipelines across multiple industries. Proficient in Node.js, NestJS, Python, AWS, Docker, and SQL, with expertise in database optimization, data modeling, ETL processes, and cloud-based solutions. Committed to building secure, scalable, and maintainable software through clean code and collaborative development practices.

SKILLS

- JavaScript
- Node.js
- React.js
- RESTful API
- Express.js
- MySQL
- HTML
- CSS
- JAVA
- Python
- Figma
- Dagster
- Docker
- Python
- Postgres
- Nest.js
- TypeScript
- DBT
- Data Modeling

WORK EXPERIENCE

Zeniark Philippine Consulting Corp.

Clark Pampanga - Remote

Backend Developer & Data Engineer

February 2024 – current

- Contribute in backend development of an Email Marketing System, including campaign creation, scheduling, tracking, and analytics. - Developed new features for an e-Procurement system.
- Built and maintained RESTful APIs and backend services.
- Optimized and refactored APIs for performance and scalability.
- Created a lead generation and campaign sending system.
- Integrated third-party APIs (e.g., email).
- Worked as a Data Engineer, building and optimizing high-performance data pipelines to ingest, transform, and process millions of records from diverse data sources.
- Designed and implemented ETL processes for structured and unstructured datasets, improving data accuracy, processing efficiency, and scalability.
- Improved database design, optimized queries, and implemented indexing strategies.
- Ensured system security through proper authentication, authorization, and input validation.
- Automated background processes using job queues and schedulers.
- Conducted code reviews and enforced backend best practices. - Troubleshooted and maintained production systems.
- Collaborated closely with frontend developers, QA engineers, and product teams.
- Utilized tools like Gitlab, VSCode, MongoDB, Postman, PostgresDB, Typescript, NestJs, NodeJs, AWS Lambda S3, Docker, Python, Dagster, DBT

24Task - Freelance Marketplace

Daet, Bicol Region, Philippines

Backend Developer

July 6 2022 – November 2023

- Develop new API for Android, iOS apps, and websites as Backend Developer
- Created and optimized APIs for enhanced app performance, seamlessly integrating with

frontend.

- Developed scalable backend solutions using JavaScript, Node.js, and React.js for frontend features.
- Worked cross-functionally with developers, designers, and managers for end-to-end solutions.
- Followed best practices for modular code, unit testing, and Git version control.
- Identified and resolved backend issues, collaborating with QA for smooth user experience.
- Contributed to code reviews and improved development standards.
- Optimized APIs for better performance and response times by leveraging the capabilities of the Serverless Framework, AWS Lambda functions, S3 for storage, RDS for relational database management, and DynamoDB for NoSQL data storage.
- Utilized tools like GitHub, Jira, VSCode, MySQL, Postman, Vercel, Serverless Framework, AWS Lambda, S3, RDS, DynamoDB

EDUCATION

Tertiary

Bachelor of Science in Computer Science

2018-2022

Sta. Elena, Institute of Science and Technology Inc.

Sta. Elena, Camarines Norte

Secondary

Maria Aurora Academy

2011-2015

Sta. Elena, Camarines Norte

OTHER INFORMATION

Date of Birth: August 5, 1997

Place of Birth: Sta. Elena, Camarines Norte
