https://devyancy.github.io/personal-portfolio/

Backend Developer with 4+ years of experience and 1+ year as a Data Engineer, specializing in scalable backend systems, RESTful APIs, and high-volume data pipelines. Strong expertise in Node.js, NestJS, Python, AWS, and ETL processes. Proven ability to optimize performance, design clean architectures, and support production systems in fast-paced environments.

Work Experience

Backend Developer & Data Engineer — 02/2024 - Present

Zeniark Philippines Consulting Corp. * Clark Pampanga Philippines * Remote

- Contribute in backend development of an Email Marketing System, including campaign creation, scheduling, tracking, and analytics.
- Developed new features for an e-Procurement system.
- Built and maintained RESTful APIs and backend services.
- Optimized and refactored APIs for performance and scalability.
- Created a lead generation and campaign sending system.
- Integrated third-party APIs (e.g., email).
- Worked as a Data Engineer, building and optimizing high-performance data pipelines to ingest, transform, and process millions of records from diverse data sources.
- Designed and implemented ETL processes for structured and unstructured datasets, improving data accuracy, processing efficiency, and scalability
- Improved database design, optimized queries, and implemented indexing strategies.
- Ensured system security through proper authentication, authorization, and input validation.
- Automated background processes using job queues and schedulers.
- Conducted code reviews and enforced backend best practices.
- Troubleshooted and maintained production systems.
- Collaborated closely with frontend developers, QA engineers, and product teams.
- Utilized tools like Gitlab, VSCode, MongoDB, Postman, PostgresDB, Typescript, NestJs, NodeJs, AWS Lambda, S3, Docker, Python, Dagster, DBT.

Backend Developer — 07/2022 - 11/2023

24Task - Freelance Marketplace • Daet, Bicol Region, Philippines

- Develop new API for Android, iOS apps, and websites as Backend Developer.
- Created and optimized APIs for enhanced app performance, seamlessly integrating with frontend interfaces.
- Developed scalable backend solutions using JavaScript, Node.js, and React.js for frontend features.
- Worked cross-functionally with developers, designers, and managers for end-to-end solutions.
- Followed best practices for modular code, unit testing, and Git version control.
- Identified and resolved backend issues, collaborating with QA for smooth user experience.
- Contributed to code reviews and improved development standards.
- Optimized APIs for better performance and response times by leveraging the capabilities of the Serverless Framework, AWS Lambda functions, S3 for storage, RDS for relational database management, and DynamoDB for NoSQL data storage.
- Utilized tools like GitHub, Jira, VSCode, MySQL, Postman, Vercel, Serverless Framework, AWS Lambda, S3, RDS, DynamoDB.

Education

Sta. Elena Institute of Science and Technology Inc. **2018 - 2022**
Bachelor of Science in Computer Science • Sta. Elena, Camarines Norte

Maria Aurora Academy Inc. **2011 - 2015**
Secondary Education • Sta. Elena, Camarines Norte

Tech Stack

Backend: JavaScript, Node.js, Nest.js, Express.js, RESTful API, TypeScript
Data Engineering: Python, Dagster, DBT, ETL, Data Modeling
Databases: PostgreSQL, MySQL, MongoDB, DynamoDB
Cloud & DevOps: AWS Lambda, S3, RDS, Docker, Serverless Framework
Tools: GitLab, GitHub, VSCode, Postman, Jira, Vercel
Other: Java, HTML, CSS, Figma, React.js, Debugging

Other Information

Date of Birth: August 5, 1997
Place of Birth: Sta. Elena, Camarines Norte
